LABOR MARKET DIGEST

July Data

September 2006

Employee Benefits in Private Industry, March 2006

Seventy-one percent of workers in private industry had access to employer-sponsored medical care plans, and 52 percent participated in medical care plans in March 2006, according to data released by the Bureau of Labor Statistics, U.S. Department of Labor. The large majority of employees covered by medical care plans were in plans requiring employee contributions for single coverage and family coverage. Employee contributions to medical care premiums averaged \$296.88 per month for family coverage; for single coverage, employee contributions averaged \$76.05 per month.

About half of private industry employees participated in an employer-provided retirement plan. Twenty percent of employees were in defined benefit plans and 43 percent were covered by defined con-

tribution plans. (Some employees participate in both types.) The overall coverage of retirement plans has held relatively steady for the last few years. The mix of plans, however has changed. Defined benefit plans cover a smaller portion of workers than they did 10 years ago, while defined contribution plans cover a larger portion.

Access to and participation in benefit plans varied by occupational group, full-and part-time work schedule, union status, and earnings. For example, workers in white-collar occupations were more likely to participate in defined contribution plans than service workers. Union workers had higher rates of coverage for most benefits. Paid leave benefits (vacation, holidays, etc.) were commonly available to most workers regardless of occupation or union status but were reported less frequently for part-time and service workers.

Percent of private industry workers in the U.S. participating in health care and retirement benefits, March 2006

Characteristics	Retirement benefits			Health care benefits

¹ Civilian labor force, employed, and unemployed estimates are by place of residence. Current year estimates are preliminary; year-ago estimates are revised. Items may not add due to rounding. All data exclude members of the Armed Forces.

² Total employment includes nonfarm wage and salary workers, agricultural workers, unpaid family workers, domestics, the self employed, and workers involved in labor disputes.

³ People are classified as unemployed, regardless of their eligibility for unemployment benefits or public assistance, if they meet all of the following criteria: 1) they were not employed during the survey week; 2) they were available for work at that time; and 3) they made specific efforts to find employment some time during the prior four weeks. Persons laid off from their former jobs and awaiting recall and those expecting to report to a job within 30 days need not be looking for work to be counted as unemployed.

⁴ The unemployment rate is calculated by dividing the total number of unemployed by the total civilian labor force and is expressed as a percent.

⁵ Bangor; Lewiston-Auburn; Portland-South Portland-Biddeford; Portsmouth, NH-ME; and Rochester-Dover, NH-ME are Metropolitan Statistical Areas. Augusta, Brunswick, Rockland, Sanford, and Waterville are Micropolitan Statistical Areas.

⁶ Adjacent metropolitan and/or micropolitan statistical areas that have a specific level of economic integration, but still retain separate identities.

⁷ Maine portion of the area which includes towns in both Maine and New Hampshire.

Area Analyst's Corner

Central Maine

Merrill Huhtala (207) 287-4994

In Augusta, construction of the 42,000 square foot, \$9.9 million **Kennebec Valley YMCA** is nearing completion. ♦**Inland Hospital** announced a \$2.45 million expansion of their emergency room in Waterville. Construction should begin in November. ♦**T-Mobile USA** celebrated 12 months of operation in Oakland. Currently employing about 650, the company hopes to add an additional 50 workers. ♦Union workers at **Huhtamaki Consumer Packaging** of Waterville and the **Sappi Fine Paper Somerset Mill** voted to ratify contracts between their employers and respective union locals.

Western Maine

Gerard Dennison (207) 753-9045

The **Atrium Inn and Convention Center** in Brunswick is expected to close in October 2006 and 25 workers will lose their jobs. The uncertainty over the BNAS base closing was cited as the reason for the closing. ♦In August 2006 the Department of Defense released \$336 million to **Bath Iron Works** for final design work on the DDG-1000 destroyer. BIW and Ingalls will each build one DDG-1000 destroyer next year. The Pentagon is expected to release another \$78 million to BIW later this year for detailed design work. ♦**BIW** was also awarded a U.S. Navy contract worth \$10.2 million toward contract work on the DDG-103, the USS Truxtun.

North/East Maine

Craig Holland (207) 941-3076

Mount Desert Island Biological Laboratory has begun construction of a new 15,000 square foot research facility. When completed in 2008, research space will be increased at the lab by more than twenty percent. ♦**Jackson Laboratory** has opened its new \$26 million research facility on its Mount Desert Island campus. The new facility will enable the lab to add 125 positions to its current total of 1,300 employees. ♦**Lincoln Paper & Tissue LLC** installed their new \$36 million tissue machine on schedule and it will be operational shortly. The tissue machine's activation will double the plant's capacity and add about 40 full-time workers to the plant's 354 employees.

Southern Maine

Gerard Dennison (207) 753-9045

Crazy Horse Custom Embroidery of Arundel was recently purchased by Military Accessories and Community Support (M.A.A.C.S) of Wells. Since the purchase, operating equipment has been updated and 13 jobs have been created. M.A.A.C.S supplies badges and nametags to the military, fire and EMS services, schools, and businesses. ♦**ITV Direct**, based in Beverly, Massachusetts, is expanding its Biddeford operations into the former district courthouse on Washington Street. ITV Direct sells dietary supplements to television viewers. The company employs 30 workers at its Biddeford call center and expects to add up to 150 more employees in the immediate future.

¹ See footnotes 1 and 2 on page 7. The nonfarm wage and salary estimate is seasonally adjusted independently. Not all supersectors are seasonally adjusted. Information and other services are not suitable for seasonal adjustment because they have very little seasonal and irregular movement. Source: see page 2.

Maine Unemployment Rate 4.8 Percent in July

State Labor Commissioner Laura Fortman announced that the preliminary seasonally-adjusted July unemployment rate for Maine was 4.8 percent compared to 4.9 percent a year ago. Both the national and Maine unemployment rates rose from 4.6 percent in June to 4.8 percent in July.

"The trend of slow job growth continued in Maine as the number of seasonally-adjusted nonfarm wage and salary jobs rose by 1,200 between June and July to 614,900. Small gains were recorded by most of the major industries. The only job loss was recorded by government," said Commissioner Fortman.

Between July 2005 and July 2006 the total number of nonfarm wage and salary jobs rose by 3,300. Job gains were recorded in professional and business services, health care and social assistance, local government, and construction. Job losses were primarily in manufacturing.

Other New England states reporting a seasonally-adjusted unemployment rate for July include New Hampshire, 3.6 percent; Connecticut, 4.3 percent;

Massachusetts, 4.7 percent; and Rhode Island, 5.6 percent. The adjusted national rate for July was 4.8 percent, up from 4.6 percent for June and down from 5.0 percent for July 2005.

The not-seasonally-adjusted Maine unemployment rate for July was 4.4 percent, unchanged from 4.4 percent for June and down from 4.5 percent for July 2005. The unadjusted national rate was 5.0 percent for July, up from 4.8 percent for June and down from 5.2 percent for July 2005. Not-seasonally-adjusted July unemployment rates for Maine counties ranged from 3.5 percent in York County to 7.2 percent in Washington County.

Not-seasonally-adjusted nonfarm wage and salary jobs in Maine fell by 2,200 between June and July to 624,700. Local government jobs dropped by 13,500 due to seasonal reductions of nonprofessional staff in local schools. These losses were mostly offset by seasonal gains in leisure and hospitality services, retail trade, construction, and professional and business services.

¹ Hours worked and earnings data are computed based on payroll figures for the week including the 12th of the month for manufacturing production workers. Average hourly earnings are calculated on a gross basis, and include such factors as premium pay for overtime and shift differential, as well as changes in basic hourly and incentive rates of pay. Average weekly earnings are the product of weekly hours worked and hourly earnings.

¹ Seasonally Adjusted. ² Not Seasonally Adjusted.

Footnotes: From page 6.

¹ Nonfarm wage and salary employment estimates include all full- and part-time wage and salary workers who worked during or received pay for the pay period which includes the 12th of the month. Domestic workers in private households, proprietors, the self-employed, and unpaid family workers are excluded. Estimates measure the number of jobs by industry. Current month's estimates are preliminary; prior month and year-ago estimates are revised. These estimates are benchmarked to March 2005. As a measure of reliability, the March 2005 benchmark revision for total nonfarm wage and salary employment was 1.2 percent lower than the original sample-based estimate.

² Regular teachers are included in summer months whether or not specifically paid in those months.

* Where an employment estimate is not entered, either the data is not available in sufficient detail for publication or is nondisclosable by law.

Wages and Salaries Increasing at Slower Rate Than Benefits

Benefit costs for civilian workers in the United States rose more rapidly than wages and salaries for the seventh consecutive year.

**Percent Changes in the Employment Cost Index for Wages and Salaries and Benefit Costs, Civilian Workers in the United States
June to June, 2001-2006**

The Employment Cost Index (ECI), a component of the National Compensation Survey, measures changes in compensation costs, which include wages, salaries, and employer costs for employee benefits.

The compensation gains for civilian workers for the year ending June 2006 was 3.0 percent compared to a 3.2 percent gain for the year ending June 2005.

The components of compensation differed in their rate of change. Increases in wages and salaries remained low. Benefit costs rose during the year at a reduced rate from the previous year. For civilian workers, wages and salaries rose 2.8 percent

in the year ending June 2006, compared with a gain of 2.5 percent increase for the year ending June 2005. Benefit costs increased 3.4 percent for the year ending June 2006, compared with an increase of 5.0 percent for the year ending June 2005.

These data are a product of the Bureau of Labor Statistics Employment Cost Trends program. Annual changes are June to June. "Civilian workers" include those in private industry and state and local government. The ECI excludes the self-employed and farm, private household, and Federal government employees.
