FISHERMEN

The advancement of Maine in the field of Conservation made during recent years has placed Maine among the leaders.

This is made possible by the interest of our people who have been insistent in their demands that the program of Conservation coupled with that of propagation of our game fish be so designed that it will supply our waters with sufficient game fish to meet the needs of today and yet have a supply for the future.

The propagation program has made possible a vast increase in the number of legal size fish liberated.

The continued support of the people will make Maine a Fisherman's Paradise.
